

# First Worldwide NFT Marketplace for Real-World Solar Panels

*Gregor Novak*  
*Co-founder and President*

**SUNCONTRACT**  
Global Energy Marketplace

## Vision

To create a world where everyone, everywhere has an easy access to renewable energy that can be freely managed by it's owners with the help of blockchain.

Decentralization

## Mission

To create a Global Energy Marketplace based on decentralized renewable energy where people can master their own energy.

Digitalization

Democratization

# P2P Energy Marketplace

SUNCONTRACT  
Global Energy Marketplace

Since 2018

Buying & selling  
Set the price  
Transfer  
Choose the source

Be the Master  
of your own  
electricity

The screenshot displays the SUNCONTRACT P2P Energy Marketplace interface. At the top, there are navigation tabs: MARKETPLACE, INDIVIDUAL DEALS, MONITORING, MY METERS, and TRADING HISTORY. Below the navigation, there are input fields for 'Buy energy' (set to November 19), 'Serial Number' (set to zavrate), and 'Cover'. A 'Contact price' of ST: 0.051 € / kWh is displayed. The main content is divided into two sections: 'Consumer Order' (green header) and 'Producer Order' (yellow header). Both sections have a 'Prices' dropdown menu. The 'Consumer Order' table lists five orders with ST prices ranging from 0.0570 to 0.0573. The 'Producer Order' table lists five orders with ST prices ranging from 0.0589 to 0.0700, including P2P deal percentages and 'Type' icons.

Consumer Order	
ST	HT
0.0573	0.0797
0.0572	0.0796
0.0570	0.0793
0.0570	0.0793
0.0570	0.0793

Producer Order	
ST	HT
0.0325	0.0985
0.0589	0.0889
0.0650	0.0904
0.0650	0.0904
0.0700	0.0974
